

QUALITY POLICY

The Management of RADIOASTROLAB S.r.l. pursues a modern and dynamic quality management to improve its capabilities and performance, its organization and obtain maximum effectiveness and efficiency from all company processes and guarantee maximum customer satisfaction.

The main benefits for the company deriving from the Quality Management System can be summarized as:

- full customer satisfaction;
- the ability to provide products and services that meet customer requirements;
- evaluate the risks, face them and contain them.

The purpose of the certification is as follows: Design, production and testing of electronic boards. Design, production and testing of modules for industrial and scientific electronic equipment. Development, production and testing of electronic equipment.

RadioAstroLab, thanks to its skills, also proposes itself as an ideal partner for customers who wish to develop custom applications.

Flexibility and ability to guarantee qualified technical support are the distinctive feature of the company, which has always set itself the goal of excellence.

All company functions work together to achieve this important goal and to continuously improve all company processes.

The company quality policy can be summarized in the following operating principles:

- involve and empower all Company personnel;
- implement effective and efficient product manufacturing processes, so that the products themselves meet the required requirements;
- guarantee the customer maximum technical assistance during the design and / or after-sales phase;
- respect the laws and regulations in force;
- prevent non-conformities;
- satisfy the customer in accordance with his requests;
- obtain maximum transparency towards the customer by defining exactly all aspects of the supply;
- use only reliable suppliers and create collaborative relationships with them;
- provide maximum support to the customer for the solution of his problems and provide high quality products.
